Talasa Terra is the second residential development within Talasa Utopian Village in El Verger, near La Almadra beach and Dénia. Its first phase comprises 65 two- and three-bedroom homes, including apartments, penthouses and townhouses. Private terraces and gardens vary by home. The community is designed around energy efficiency, shared outdoor spaces and a relaxed Mediterranean lifestyle. Residents enjoy landscaped areas, pools and social spaces, together with access to Talasa Beach, the village's separate beachfront communal facility with a pool, showers, bicycle parking and storage for nautical equipment. Rainwater reuse, photovoltaic energy and electric-vehicle charging form part of the wider sustainability concept. Enjoy Houses Spain can
